

MediaDesk In-Rush Cable Owner's Manual Addendum #1 / US

**The following products are affected by this addendum:
MediaDesk 2.1 Main Amplifier Module - Serial numbers listed below**

Group A 01000001 to 01001550

Group B 01001651 to 01001850

Group C 01001852 to 01001939

Group D 01001951

The MediaDesk In-Rush Cable incorporates an integral current limiter, which will reduce the in-rush current during power up of a MediaDesk system and eliminates in-rush related fuse failures. Included you will also find a spare replacement fuse.

The MediaDesk In-Rush Cable is designed to permanently replace the standard MediaDesk IEC power cord. The cable is unique and not interchangeable with other IEC power cords.

NOTE: When MediaDesk is ON the cable may get very warm. This is part of the normal function of the in-rush limiter within the cable assembly and is expected.

IMPORTANT! It is strongly recommended that you wait a minimum of 10 minutes between power down and power up cycles. This will allow the current limiter time to fully cool and effectively limit in-rush current during the next power up cycle.

CAUTION!: This cable should only be used with MediaDesk and is not designed to work with any other products. Additionally, it should only be used with those MediaDesk systems that are part of the serial number group listed above.

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

WARNING:To reduce the risk of fire or electrical shock, do not expose this equipment to rain or moisture. Do not remove cover. No user serviceable parts inside. Refer servicing to qualified personnel.

**AVIS: RISQUE DE CHOC ELECTRIQUE
NE PAS OUVIR**
